

Inflatable Lamp

Instruction Manual

SAFETY GUIDELINES

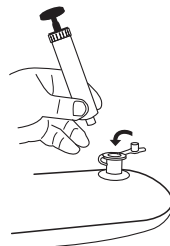

- Keep away from sharp objects.

- Keep away from fire.

- Do not use high pressure air pump to inflate. It may cause an explosion.

- To prevent air leaks, cover the cap immediately after removing the air pump.

- **Tips:** Please deflate and store after each use.
- **Tips:** Please don't inflate with too much pressure.
- **Tips:** Do not allow water to enter the inflatable lamp.

SPECIFICATIONS

Main Material	TPU
Input Rated Voltage	12V DC
Maximum Power	6W
Maximum Working Current	0.5A
Light Source	LED
Color Temperature	2700K/6500K
Remote Control Distance	20M
Operating Temperature	-20~50°C/-4~122°F
Storage Temperature	-20~60°C/-4~140°F

CHAGE THE BATTERY

Open the back cover to repalce the battery.

Lithium Battery: 3V
